# CD4069UBC Inverter Circuits

#### **General Description**

The CD4069UB consists of six inverter circuits and is manufactured using complementary MOS (CMOS) to achieve wide power supply operating range, low power consumption, high noise immunity, and symmetric controlled rise and fall times.

This device is intended for all general purpose inverter applications where the special characteristics of the MM74C901, MM74C907, and CD4049A Hex Inverter/Buffers are not required. In those applications requiring larger noise immunity the MM74C14 or MM74C914 Hex Schmitt Trigger is suggested.

All inputs are protected from damage due to static discharge by diode clamps to  $\rm V_{DD}$  and  $\rm V_{SS}.$ 

#### **Features**

■ Wide supply voltage range: 3.0V to 15V

■ High noise immunity: 0.45 V<sub>DD</sub> typ.

■ Low power TTL compatibility: Fan out of 2 driving 74L

or 1 driving 74LS

■ Equivalent to MM74C04

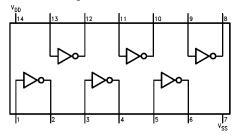

#### **Ordering Code:**

| Order Number | Package Number | Package Description   |  |  |  |  |
|--------------|----------------|---|--|--|--|--|
| CD4069UBCM   | M14A           | 14-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-120, 0.150" Narrow Body |  |  |  |  |
| CD4069UBCSJ  | M14D           | 14-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide                     |  |  |  |  |
| CD4069UBCN   | N14A           | 14-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300" Wide            |  |  |  |  |

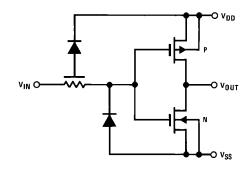

Device also available in Tape and Reel. Specify by appending suffix "X" to the ordering code.

## Absolute Maximum Ratings(Note 1)

(Note 2)

Recommended Operating Conditions (Note 2)

Storage Temperature Range ( $T_S$ )  $-65^{\circ}C$  to +15

Power Dissipation (P<sub>D</sub>)

Dual-In-Line700 mWSmall Outline500 mW

Lead Temperature (T<sub>L</sub>)

(Soldering, 10 seconds) 260°C

Note 1: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the devices should be operated at these limits. The table of "Recommended Operating Conditions" and Electrical Characteristics table provide conditions for actual device operation.

Note 2:  $V_{SS} = 0V$  unless otherwise specified.

#### **DC Electrical Characteristics** (Note 3)

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
